

## **Water Stewardship Strategy**

### **T.C. Pharmaceutical Industries Company Limited**

Water is a natural resource that serves as the main raw material for the beverage industry. Everyone on this planet and every industry is connected to and requires access to water sources. T.C. Pharmaceutical Industries Co., Ltd. recognizes the importance along with the challenges of increasingly severe water situations, including disasters from drought, flooding, access to water sources, and water quality.

#### **Corporate Purpose**

"Energizing a Better World for All" – The TCP Group recognizes the importance of conducting business that reduces environmental impact while simultaneously creating sustainability for society. Therefore, sustainable water management has been established as one of the organization's key strategies. The company has set a goal to replenish more clean, safe water back to communities than the company uses, or achieve "Net Water Positive" by 2030.

#### **Water Stewardship Strategy**

1. Use water resources efficiently and to maximum benefit by reducing water impacts in the production process.
2. Work with partners and communities to restore, maintain, create water balance, and return water to nature, especially in areas surrounding manufacturing plants. We collaborate with all stakeholders including communities, civil society, businesses, and government sectors to reduce risks, create opportunities, and achieve water security outcomes in these areas.
3. Manage water sustainably according to Alliance for Water Stewardship (AWS) Standard.

#### **Outcomes**

1. Improve water governance effectiveness
2. Sustain good water balance
3. Ensure good water quality
4. Restore and protect important water-related areas
5. Provide universal access to safe water, sanitation, and hygiene for all (WASH)
